

Certificate of Appreciation

is hereby granted to:

Luc Rochat

In recognition of Continuous Improvement I would like to recognize the Quality Team, in brainstorming ideas to improve efficiency, throughput, knowledge and ability through cross training, adequate measurement processes to assure Customer Satisfaction, as we strive to be agile. The team has produced several inspection check gages, inspection programs, added equipment which reduces the touch time of inspection. These types of events provides the people a solid understanding and consistency in the measurement system (Advanced Inspection methods). This activity will continue to set KIHOMAC apart from other companies, it allows the team to be informed on measurement systems for best methods, easier cross training to reduce single point entities of knowledge or ability in the inspection methods. This allows the team to flex throughout the days schedule without the worry of not having the right person at the right time. The Team continues to embrace the process of CI for better product and process. Your hard work, dedication and commitment is exemplary, and you are highly valued at KIHOMAC!

Lecia Anderson, Director of Quality
