

Certificate of Appreciation

is hereby granted to:

Luc Rochat

In recognition of your ingenuity in utilizing the 3D print lab for various fixtures and measurement aids. Your efforts have eliminated the need for the already constrained programming and milling abilities. This has also reduced inspection time which has resulted in timely deliveries with less costs. Furthermore, you have taken what you have learned with 3D printing and went on to train others on KIHOMAC 3D printing capabilities and taught us how to use the machines. Your efforts are greatly appreciated. Thank you.

Brad Goodwin
